

MIGUEL RAMIREZ EXOJO

PROFESSIONAL SUMMARY

Cloud & DevSecOps Engineer with 19 years of experience in Information Technology, including 10 years as a certified Linux System Administrator and 8 years focusing in practical Cloud architecture, FinOps cost optimization and DevOps/CI/CD automations across AWS, GCP and Azure. Proven contributor to collaborative, agile developer toolchain environments.

TECHNICAL PROFICIENCY

- **Cloud & FinOps:** Expert in AWS, proficient GCP and Azure, applying infrastructure and FinOps best practices for cost optimization and management.
- **Infrastructure as Code (IaC) & Automation:** Certified proficiency in Terraform, alongside experience with Ansible, Packer, and scripting for CDK/SDK APIs for automated operations.
- **Containers:** Expertise in Kubernetes (EKS/ECS, GKE, AKS), Docker, Podman and Helm, deployed over managed services.
- **CI/CD & DevSecOps:** Implementation of CI/CD pipelines using GitHub Actions, Jenkins and some projects with Azure DevOps and Gitlab CI. Security controls via IAM services and tools like SonarQube, Snyk, Semgrep, Trivy, OWASP ZAP, DefectDojo and DependencyTrack.
- **Development & Scripting:** Practical experience with Python, Bash, Git, YAML. Knowledge of TypeScript/CDK APIs. Experience managing and overseeing development toolchains and GitHub/GitLab organizations. Improving results last months by AI Agents.
- **AI Infrastructure:** NVIDIA NCA-AIIO certified (2026) in AI Infrastructure and Operations.
- **OS, Networking & Identity:** Linux LPIC3 certified (L3 level). Windows Server, Azure Entra ID, OpenLDAP. All projects working with TCP/IP, DNS, SMTP, HTTPS, VPN.

PROFESSIONAL EXPERIENCE

Freelance Cloud & DevOps (2022 - Present)

Client Engagements: Orange Bank, Softeca.es, Biability.com, SantaLucía, Jefferson Frank IT Consulting

- Set up and managed a complete DevOps ecosystem, including managing and overseeing the main development toolchain, especially the GitHub Organization. Reduced deployment time by ~40% and eliminated manual errors by implementing a Terraform & GitHub Actions driven DevSecOps processes, including tools like Snyk, Semgrep, Sonarqube, dependencytrack, zizmor, Defectdojo...etc
- Deployed optimized cloud configuration and established enhanced security measures (AWS/Azure), achieving a 25% reduction in monthly cloud spend through FinOps best practices (right-sizing, spot instances, and cleaning unused resources). Migrate to service like ECS, Lambda, Cloudfront, S3 and Eventbridge.
- Spearheaded the automation of Node.js data extractor deployment on a clean Azure Kubernetes Service (AKS) environment utilizing Azure DevOps, resulting in Accelerated BI Deployment and enabling the swift delivery and scalable functioning of daily urban transportation business reports.
- Provided L2/3 SysOps support, focusing on technologies including Kubernetes (implemented with Terraform/Terragrunt), ELK stack, Grafana, and Kafka.
- Proposals AWS architectures for on-demand IT Consulting. Developed and delivered customized training courses on Terraform for Azure.

Cloud & DevOps Engineer Employee (2016 - 2022)

Copado (US) | Cloud Infrastructure Engineer (2021 - 2022)

European member, contributing to global collaboration across US and India

Implemented comprehensive IaC solutions for Copado Version Control (Salesforce platform) leveraging custom Terraform modules integrated with GKE, Cloud Storage, and Cloud SQL.

Established and maintained robust observability solutions (Sumo Logic, Fluentd, Prometheus) across Heroku, AWS, and GCP. Designed and deployed kube-metrics ingress into Sumo Logic from diverse environments. Managed and resolved critical system outages (e.g., log4j), achieving a 98% distributed system uptime through proactive performance monitoring and engineered observability alerts via Sumo Logic.

Enhanced and troubleshooted Continuous Integration/Continuous Deployment (CI/CD) pipelines, incorporating multi-stage Dockerfiles within GitLab CI, and developed new pipelines with integrated HashiCorp Vault security.

Provided comprehensive level 3 support for complex infrastructure challenges (e.g., SonarQube upgrades, Cloud Armor rules, DNS resolution issues) and routine tasks (e.g., EU database migrations from Heroku to Cloud SQL EU regions, project/permissions management). Delivered essential infrastructure enablement and support services to Scrum-based Salesforce development teams.

Sngular (Spain) | Cloud & DevOps Engineer (2018 – 2021)

Decathlon Spain (2020 – 2021)

Managed a multi-cloud environment (AWS/GCP), including migrations from AWS EKS to GCP GKE, to facilitate application portability and optimize costs. Ensured infrastructure consistency and automation through the utilization of Terraform and Ansible. Streamlined continuous deployment with CloudBuild pipelines for Kubernetes applications and oversaw global projects using Terraform Cloud.

Telefónica Foundation (2018 – 2020)

Designed and executed Infrastructure as Code (IaC) for a global, highly available volunteering platform, encompassing 8 autoscaling groups, 3 High Availability master/slave setups (Jenkins, MongoDB, GlusterFS), S3, RDS MySQL, Route 53, CloudFront, and IAM policies/roles. Improved deployment speed and reliability by automating image builds using Ansible, Packer, and Terraform. Maintained source code integrity via bidirectional synchronization of the GitLab repository. Supported project success by managing client relationships (Accenture) and delivering training to Telefónica engineers.

Hbwell (2019 – 2020)

Managed a secure, scalable appointments/payments platform for beauty clinics on AWS (EFS, EC2, ASG, ALB, VPN Site-to-Site), using IaC (Terraform, Ansible) and centralized Graylog/Sensu for logging/monitoring. Provided continuous operational support.

Sngular Internal Services (2018 – 2020)

Maintained operational efficiency for internal services (Gitlab, Sonarqube, Nexus Sonatype, Keycloak, Jira, Confluence, Sensu, and Graylog) through the application of IaC tools. Ensured service continuity by providing on-call support for critical incidents.

Nokia Spain | Site Reliability Engineer (2016 – 2018)

Oversaw physical infrastructure within the Central Processing Data (CPD) center, including the configuration of new hardware as network switches and compute/store servers to enable new environments.

Managed and maintained OpenStack (Mitaka/Pike) environments, deploying, configuring, troubleshooting, and optimizing compute, storage, and networking resources.

Designed and implemented a bare-metal deployment and configuration system utilizing MAAS (canonical), automating provisioning and OS installation to reduce cycle time and manual effort with customized Red Hat Linux ISOs for system deployments. PoC of a Puppet Server architecture, leveraging Hiera for configuration data abstraction, facilitating the management of multi-environment configurations.

Established a monitoring stack (Grafana/InfluxDB) and executed performance analysis employing SARS for the identification and remediation of system bottlenecks, collaborating internationally on the development, implementation, and support of features for SAT TV Over-The-Top (OTT) streaming services.

Linux SysAdmin & Systems Engineer (2007 – 2016)

IIC | Senior Linux System Administrator (2012 – 2016)

Administered Ubuntu and CentOS Linux environments, encompassing deployment, patching, and troubleshooting. Executed Physical-to-Virtual (P2V) migrations of legacy physical servers to virtualization platforms, including VMware vSphere/ESXi and oVirt (KVM). Core administration included:

- RAID/HA: Managed hardware (Dell PERC) and software RAID solutions for data integrity and High Availability.
- Email: Administered Dovecot (IMAP/POP3) with LDAP authentication and provided support for the Open-Xchange platform.
- Web: Managed and secured Apache and Tomcat environments, including deployment, hardening, and performance tuning.
- Databases: Maintained and optimized MySQL and PostgreSQL RDBMS to ensure continuous uptime.
- Backup/DR: Designed and managed Bacula backup systems across tape and digital media, automating verification and restore processes via shell scripting.

- Monitoring/HA: Deployed and maintained Nagios for continuous system health monitoring, configuring checks, alerts, and developing custom plugins.
- On-Call: Participated in a 24/7 on-call rotation for critical incident response.
- Leadership: Provided strategic direction and oversight for the Systems department for seven months, focusing on team coordination, project prioritization, and critical infrastructure decision-making.

ZeppelinTV | Systems Engineer (2008 – 2011)

- Managed Windows Server environments (2000-2003), focusing on Active Directory (AD) configuration (GPOs, user/group management, authentication) and foundational TCP/IP services (shared file access, configuration).
- Experience administering Microsoft Exchange Server 2007 and Microsoft ISA Server.
- Implemented and managed server virtualization using Citrix XenServer and VMware. Responsibilities included platform setup, VM deployment, and Physical-to-Virtual (P2V) migrations for infrastructure consolidation.
- Directed the configuration and deployment of network hardware (routers, switches, firewalls) across various locations to support temporal TV programs.
- Provided comprehensive end-user technical support, resolving issues related to workstations, networking, and printing.

IT Technician (2007 – 2008)

- Installation and maintenance of computers servers and point-of-sale systems, management of local networks and domain servers on clients. Implementation of recording systems with ip cameras and Point of Sale (POS) terminals

CERTIFICATIONS

2026: NVIDIA NCA-AIIO AI Infrastructure and Operations
2025: Google Cloud Engineer (renewed)
2023: AWS Solutions Architect Associate , FOCP: FinOps Certified Practitioner
2022: AWS Security Specialty , Google Cloud Engineer
2020: Terraform Associate Certified , ACA Alibaba Cloud
2018: Linux LPIC3 - Virtualization and High Availability
2017: OpenStack COA - Certified OpenStack Administrator , LFCS Linux
2013: Linux LPIC1 , Linux LPIC2 , Linux SUSE CLA

EDUCATION

- Computer Science (50% completed - online) - 2010 (UOC)
- High Grade Computer Systems Administration (CFGs/FP2) - 2007 (Alcazar de San Juan)

LANGUAGES

- English: Full Professional Proficiency (Daily experience in international remote environments: US, India & Europe).
- Spanish Native
